## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6, 9-12, 14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Pogue.

Pogue shows a universal cartridge for controllable delivery of a dispersant in either an open or a closed fluid system comprising:

- a housing (parts 85 and 83 assembled together) of a first thickness, the housing having an outer mateable surface at 104, the housing having a chamber therein for carrying a dispensing material, the housing having a set of discharge ports 100 as recited; and
- a sleeve 84, the sleeve having a diffusion port 107, the sleeve having an inner mateable surface located proximate the housing, the sleeve inner mateable surface and the housing outer mateable surface frictionally engaging each other to form a fluid seal therebetween to limit a diffusion path from a fluid in the chamber to a fluid outside the chamber to a transport area defined by the alignment of the diffusion port in the housing and the diffusion port in the sleeve (Column 6, lines 45-65);

Art Unit: 3752

- wherein the sleeve is rotatable with respect to the housing as recited in claim 2.

***Allowable Subject Matter***

3. Claims 3-5, 7, 8, 13, 15, and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 18-21 are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Hamilton et al. is pertinent to Applicant's invention.
